Statistical Profiles of Public School Districts

To the Governor and the Legislature of the State of New York:

Chapter 655 of the Laws of 1987 (which amended Section 215-a of State Education Law) requires the Board of Regents and the State Education Department to submit an annual report to the Governor and the Legislature with respect to "enrollment trends; indicators of student achievement in reading, writing, mathematics, science and vocational course; graduation, college attendance and employment rates; . . . (and) information concerning teacher and administrator preparation, turnover, inservice education and performance." The law further states that: "To the extent practicable, all such information shall be displayed on both a statewide and individual district basis and by racial/ethnic group and gender."

The annual report is presented in two parts. The first is an analysis of statewide data contained in the publication, New York, The State of Learning: Statewide Profile of the Educational System. The second part is the individual district profiles contained in this document. Data in both publications were derived, primarily, from information submitted by Superintendents of Schools to the Department's Information Center on Education and Division of Educational Testing. The data highlighted in the publications were selected in accordance with the specific mandates of Section 215-a of Education Law. There are, of course, other data regarding student performance, instructional programs and support services, and resources which must be considered in order to develop fully comprehensive profiles of school districts.

The information contained in this report should be helpful to the Governor, the Legislature and the citizens of New York State in assessing the effectiveness of the many educational programs supported by the State, and in working with the Board of Regents and school officials to improve learning outcomes for our children and youth.
